

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the “+” button.

Feature: + (increment) count button

Scenario: I want to increment the counter by **1** each time I click on it.

Given I am on the Tally Count App landing page, and the count is currently **0**,

When I click on ‘+’ button,

Then the number on the counter is added by 1, thus displaying the number **1**.

2. User story(ies) in Gherkin syntax for the “-” button.

Feature: - (decrement) button

Scenario: I want to decrement the counter by **1** each time I click on it

Given I am on the Tally Count App landing page, and the count is currently **1**,

When I click on the ‘-’ button,

Then the number on the counter is subtracted by **1**, thus displaying the number **0**.
